**LETTER OF RECOMMENDATION**

I am glad to recommend you **Mr. Rakesh Nagaraju**, a promising student who joined my department of Computer Science and Engineering at Nitte Meenakshi Institute of Technology in 2012 and completed his course in June 2016, for admission to graduate studies at your University. I have taught him **Advanced DBMS** in the 6th semester. I got to interact with him closely enough in 4 years to be able to review his overall performance.

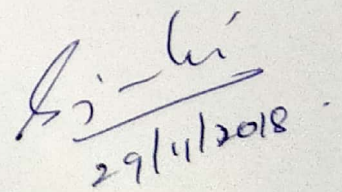

**Mr. Rakesh Nagaraju's** detail-oriented and his research aptitude is praiseworthy. He has a clear comprehension of concepts, has performed remarkably well in course work and has always completed his assignments on time. I have always found him attentive in the classroom, where I got the evidence of his mathematical and analytical ability to solve problems. Academically, he has been consistent and has maintained a good record throughout, putting on to display his dedication and punctuality. On the basis of his performance in my subjects, I would bracket him among the top 7% in his class.

He has been open to positive criticism and has never felt perturbed by any constructive criticism. He has always maintained a good rapport with his classmates. He has always maintained an excellent relation with the faculty, and this helped him to confidently approach his professors with his problems and discuss the matters.

I am confident that your esteemed university will be the ideal place for him to improve upon his existing skills while pursuing a Master's program. I strongly recommend him for any kind of Graduate Assistantship. I am sure if admitted to your University, he will make significant contribution to the ranks of your alumni some day. I wish him all the best for his future endeavors.

Please do not hesitate to contact me if you require any further information.

**Sujatha Joshi., B.E., M.Tech.**
